Aragón - Director, Population Health Division</li><li>- Amy Brownell, Hunters Point Lead</li><li>- Rachael Kagan, Director, Communications</li><li>- Stephanie Cushing, Director, Environmental Health</li></ul>	<u>Office of Community Infrastructure and Investment</u> <ul style="list-style-type: none"><li>- Nadia Sesay, Executive Director</li><li>- Kasheica McKinney, Hunters Point Project Manager</li></ul>
--	---

- Thank you for sharing your recent cancer incidence analysis for the Bayview Hunters Point neighborhood. Did you hear from the Mayor's office or the public on the analysis?

**PARCEL A**

- CDPH told us that they will complete their dust wipe sampling field work by next week. They have a few additional residences to sample. So far, they have taken approximately 225 wipes from 75 homes. They have begun analyzing the wipes and, so far, they have not seen anything. CDPH will also publish their Parcel A-2 radiological scanning report in April.
- We understand the Navy met with Supervisor Walton's office and some residents on Wednesday, March 13th. We are hopeful these conversations lead to more established engagement with impacted members of the public, and EPA is prepared to support these efforts, if asked.

**FIVE YEAR REVIEW/ PARCEL G**

- We will soon be issuing a letter to the Navy with a recommended path forward on the Five-Year Review report and the Parcel G Work Plan. We share the City's priority to have the Navy in the field as soon as possible; and, we also hope to proceed in a manner that is transparent to the public.
  - After the Navy addresses a few minor technical details, EPA is prepared to approve portions of the Work Plan that relate to the background soil testing.
  - We are recommending the Navy issue the Five-Year Review report for a 30-day public comment period, to allow the public to review the updated PRG Calculator assessments. After that comment period, EPA is prepared to expedite our review of the report and work with the Navy to approve portions of the Parcel G Work Plan that relate to the soil rework.
  - We need to continue to deliberate with the Navy and our regulatory partners on the PRG Calculator assessments for the buildings.
- We also wish to continue discussions with you about future reuse plans of the onsite buildings. We decided to take some time to schedule these discussions. We are working to schedule a pre-meeting with the EPA team and the City of SF team in April, followed by a meeting with decision-makers in early May. I understand Yolanda will reach out to you (or your calendar manager) soon.

## **COMMUNICATIONS/MEETINGS**

- Both your offices will be courtesy copied on our letter to the Navy. Once we issue the letter, we will share it with Congressional leaders, Supervisor Walton, and Dr. Hunnicutt.
- This afternoon, we will meet with Supervisor Walton's office, to update him on ongoing activities.
- This morning, we spoke with Dr. Hunnicutt on our ongoing discussions with the Navy. She raised concerns about the delay in work, due to our discussions on the PRG Calculator.
- We are curious if HPNS is on the agenda for the next HPS CAC meeting is on March 25<sup>th</sup>. Kasheica?
- Does the City have any communications/meetings updates?

## **MAYOR/SUPERVISOR**

- Are there any updates on the independent UC Berkley/UCSF panel to review CDPH's work?
- Are there any updates from Mayor Breed or Supervisor Walton?

## **NEXT MEETING**

- March 25, 2019 – Angeles will be out of town. Should we continue or cancel?
